Hi, I’m Tintswalo

Software Developer, based in South Africa.

I'm a software developer passionate about **building innovative web applications**.

My experience includes coursework and personal projects where I've gained proficiency in front-end technologies like HTML, CSS, and JavaScript, as well as back-end technologies like Node.js.

My aspiration is to work on projects that make a **positive impact in people's lives**, whether through innovative user experiences or solving complex problems.

Take a look at what I've been working on!

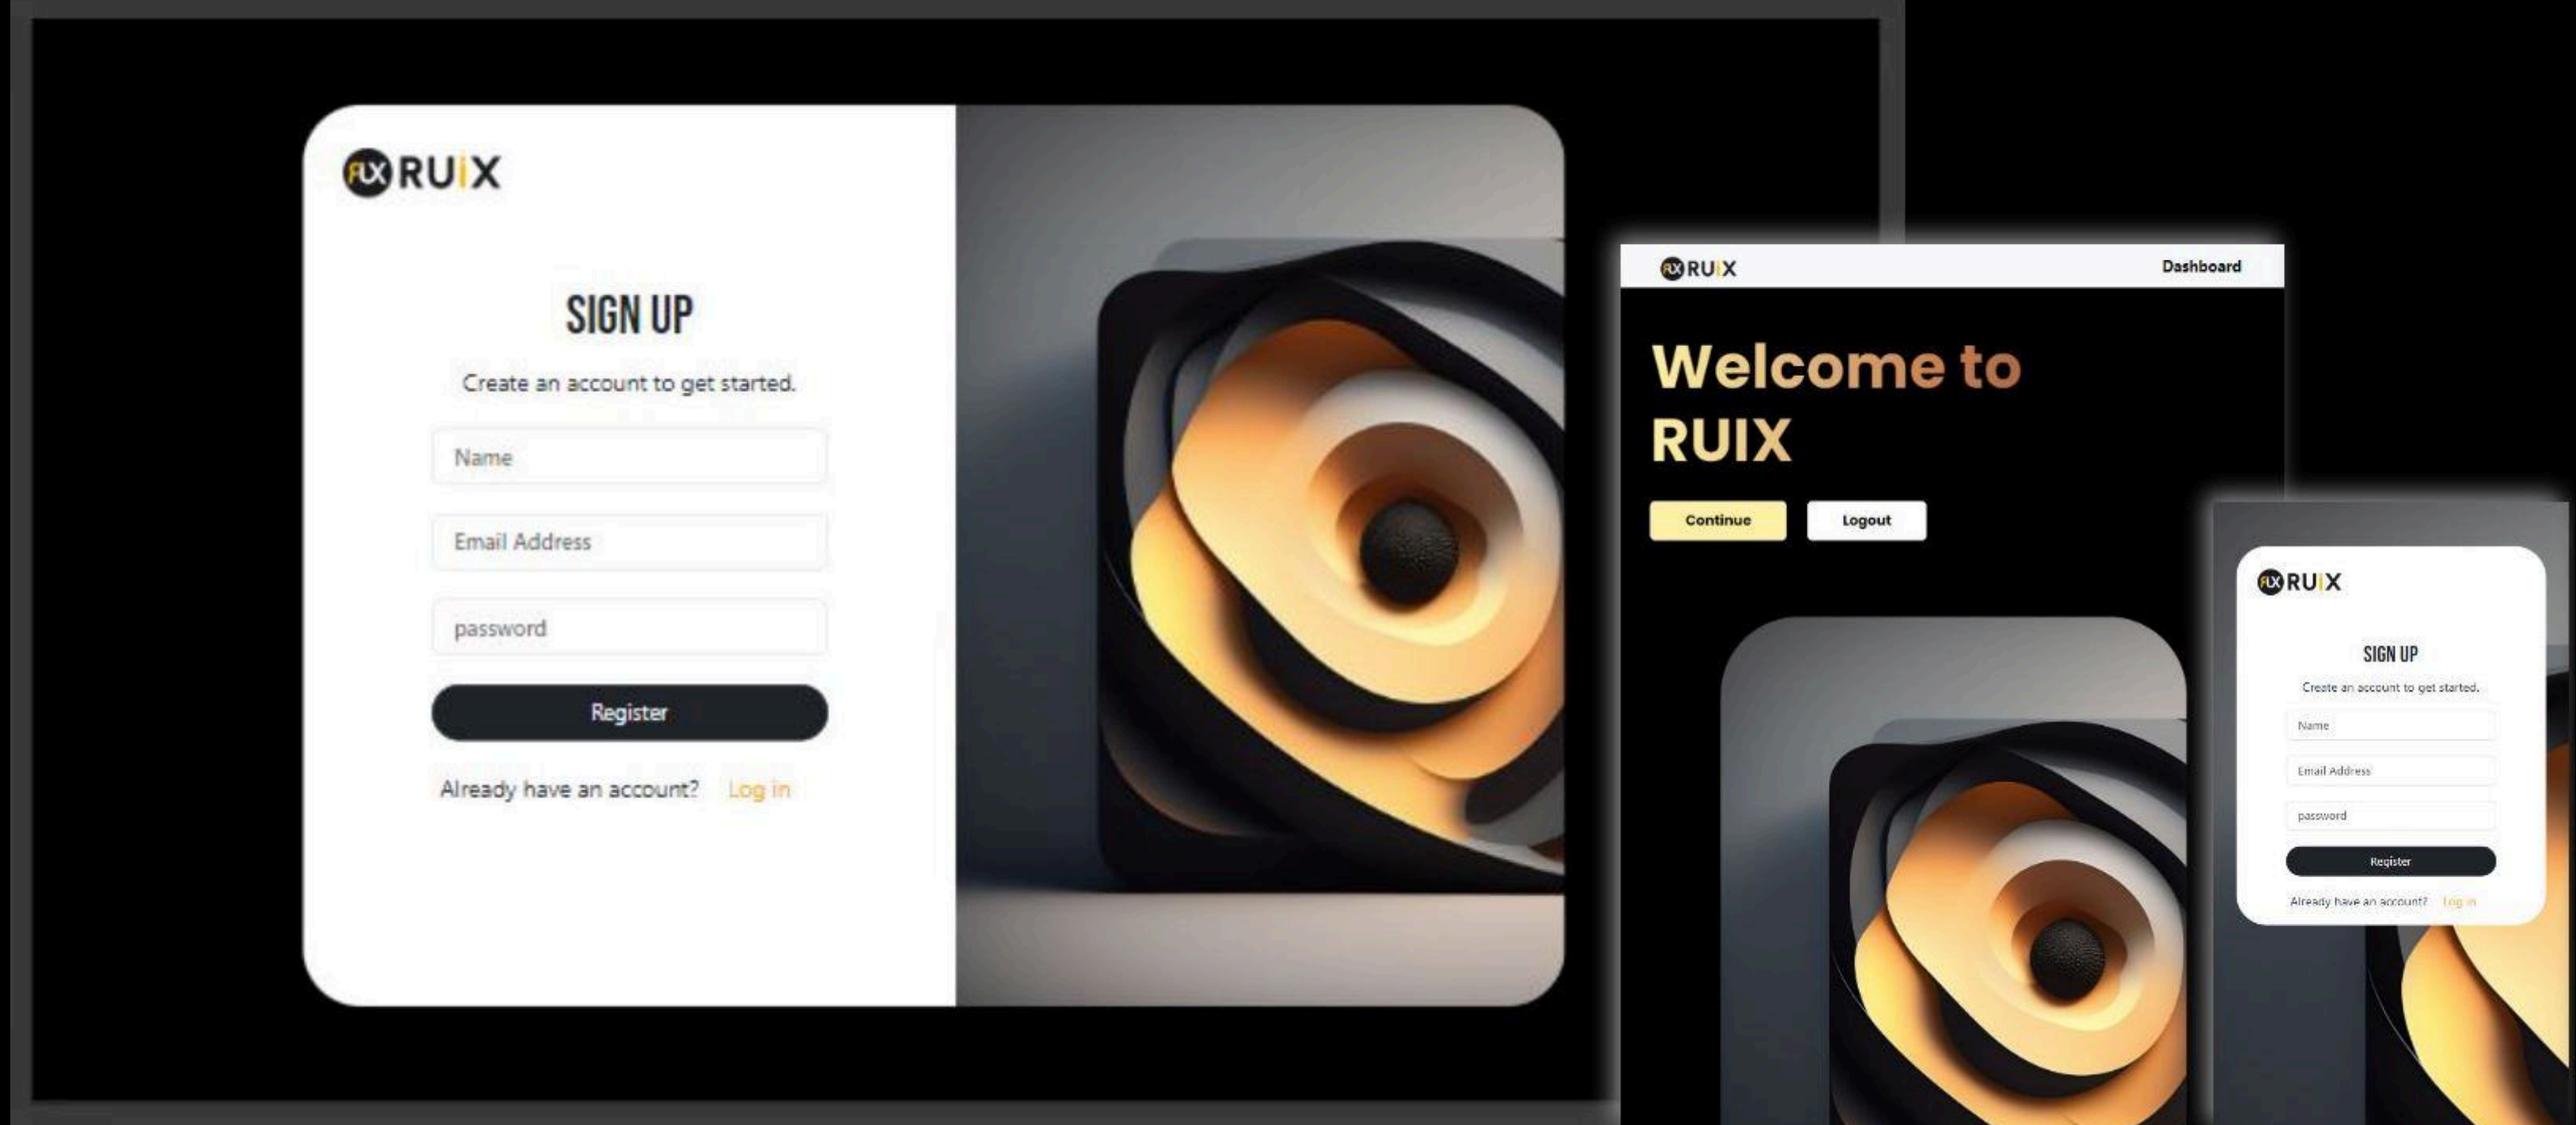

Makeover App

Bootstrap

[Visit Site](#)

[Code](#)

Built a responsive and modern web application using Bootstrap, integrating its pre-designed components and styles for efficient front-end development. This was a collaboration project with a student developer where we built a makeovers application which is a website enabling clients to book various building-related services such as renovations, interior décor, and architectural design.

Ruix App

React

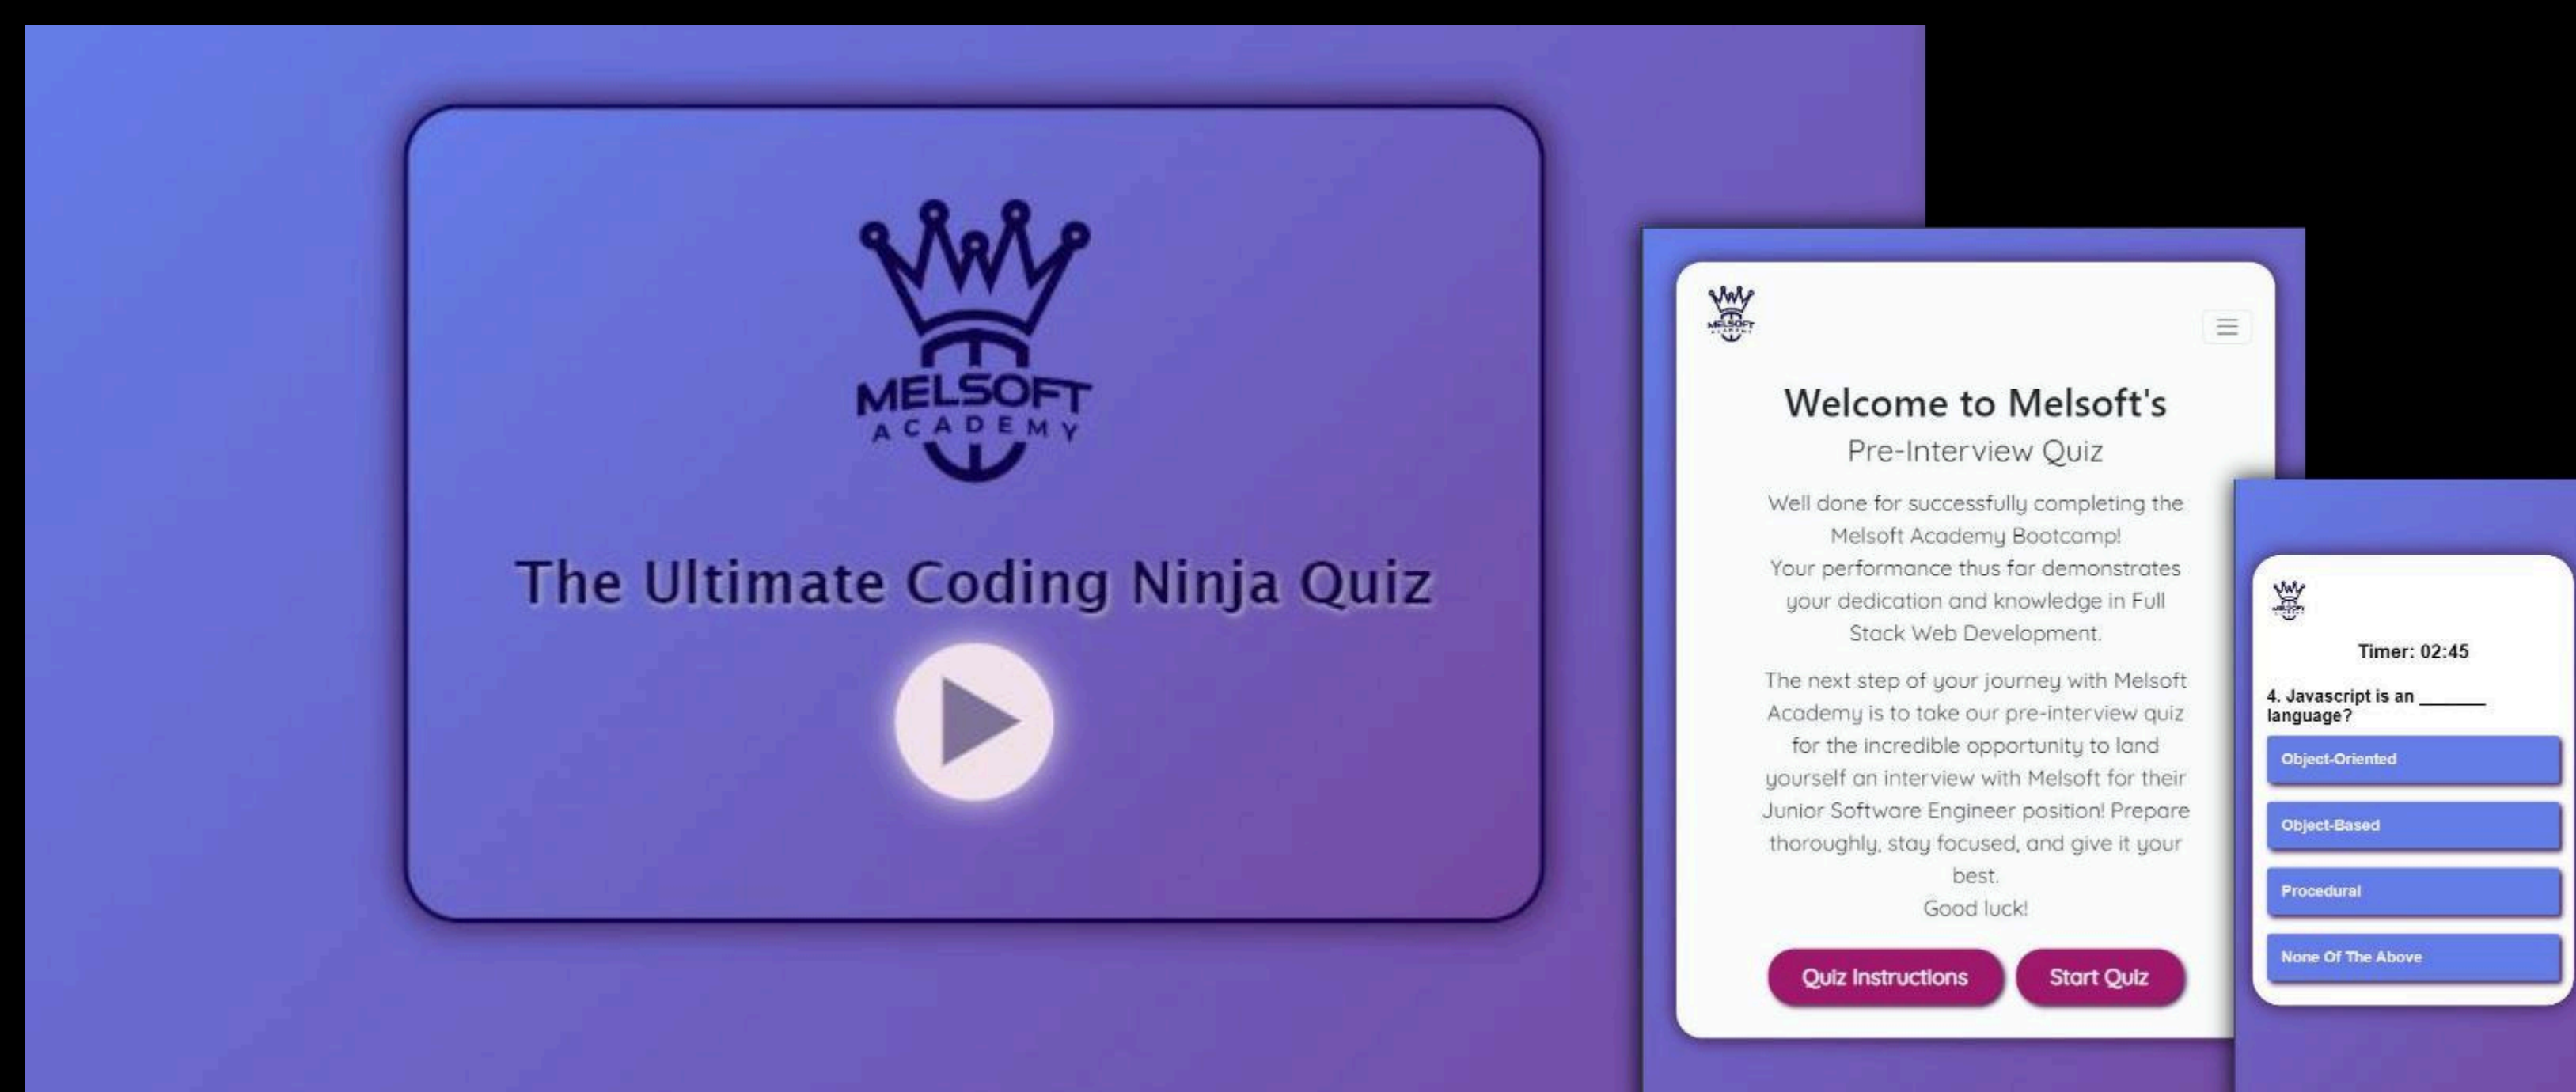

Node.js

PostgreSQL

API

[Code](#)

Ruix app is an authentication web application built using React for the frontend, Node.js for the backend, and PostgreSQL for the database. The project includes functionalities for user authentication, such as login, registration, and a dashboard page.

Coding Quiz App

HTML5

CSS3

Javascript
